

## eSIM4u Phone installation guide

### Instructions:- iPhone

#### 1. Add eSIM

On your mobile phone, go to Setting -> Cellular/Mobile Service -> Add eSIM.

#### 2. Click "User QR code"

Setting -> Cellular/Mobile Service -> Add eSIM.  
Scan the QR Code provided.

#### 3. Label eSIM

Label your eSIM to help you identify it.

#### 4. Set eSIM for Cellular/Mobile Data

Set your "New eSIM plan" as the default line for mobile data to use this eSIM for internet data. Turn off the "Allow Mobile Data Switching" to avoid using mobile data from your original SIM.

#### 5. Turn On Data Roaming

Go back to the homepage. Go to Setting -> Cellular/Mobile Service -> Select the eSIM you just added and turn on 'Data Roaming' on it. Start using!

### Instructions:- Android

#### 1. Add eSIM

On your mobile phone, go to Settings -> Connections -> SIM manager -> Add eSIM.

#### 2. Click "Scan QR code"

Setting -> Connections -> SIM manager.  
Scan the QR Code provided.

#### 3. Label eSIM

Label your eSIM to help you identify it.

#### 4. Set eSIM for Mobile Data

Set your "New eSIM plan" as the default line for mobile data to use this eSIM for internet data. Turn off the "Allow Mobile Data Switching" to avoid using mobile data from your original SIM.

#### 5. Turn On Data Roaming

Go to Setting -> SIM manager -> Select the eSIM you just added and under Mobile data select the eSIM and turn on "Data Roaming" on it. Start using!

**Please install only 1 day before travel!**
